

Brain Friendly Forms of education for ADHD learners

NEWSLETTER 2 February 2023

Transnational meeting 2

The groundbreaking BFF project, aimed at enhancing educational support for adult learners dealing with ADHD, reached a significant milestone during its second transnational meeting held in Braga, Portugal, on February 9th and 10th, 2023. Hosted by SYAJ - ASSOCIACAO JUVENIL SYNERGIA, the meeting saw enthusiastic participation from all partner organizations as they deliberated on the project's progress and the development of crucial educational resources.

The meeting's agenda revolved around the project's two primary outcomes: the development of qualitative educational strategies and practical resources tailored to the unique needs of adult learners with ADHD. Key representatives from each of the partner organizations gathered to assess the progress made so far and strategize on how to further enhance the project's impact.

Throughout the two-day event, participants engaged in constructive discussions, sharing their insights, experiences, and research findings related to ADHD education. These conversations revolved around innovative pedagogical approaches and the integration of neuroscientific principles into practical teaching methods.

As the project advances, it continues to receive support and recognition from educational institutions, stakeholders, and individuals passionate about improving adult education for those with ADHD. The BFF project is poised to make a lasting impact on the lives of adult learners worldwide.
