

Brain Friendly Forms of Education for ADHD Learners

NEWSLETTER 4

3-4 November

2023

From the meeting

In the beginning of November, the partners held a transnational meeting in city of Varna. First, the President of the host organisation, Association of Psychologists in Bulgaria, welcomed all partners and wished them a pleasant stay.

The 4th meeting took place almost exactly 2 years after the project start date. The partners took time to talk about all the activities that have been carried out since then and also about the activities that are coming up in the project end.

There will be no winter holidays for this partnership as they still have a lot of tasks to do. The partners also set the deadlines for the next steps to be completed before the project final report.

After a 20 months of work on PR1 and PR2, we can say that it is almost finished. To finalize this result we just need to perform piloting with 40 participants, which will take place by the end of December and the results of which will then be summarized in a national and combined report. All the content of PR1 will be available for free on the Moodle platform.

The handbook, which is the main output of PR2, will be completed.

This product will also be available to everyone free of charge. Of course, the partners will not only be busy during the winter - translations, webinars and multiplier events are on the agenda in autumn.

More about the project and the results you can find right here:
